- Measuring & marking tools
- Iron & pressing surface
- Drill, phillips-head screwdriver bit
- Staple gun
- Fusible tape

### DIRECTIONS:

For detailed directions, visit [joann.com/projects](http://joann.com/projects).

### TIPS AND TECHNIQUES:

- Use a steel tape measure. Fabric and plastic tape measures can stretch.
- Always measure twice and cut once. Write down the dimensions for easy reference.
- When using a large print fabric, purchase an adequate quantity so that a specific motif will appear on the window treatment as desired to allow for pattern-matching.
- In projects that require a 54" width fabric, a non-directional 45" width fabric may be used if railroaded. Railroading means to turn the fabric sideways so that the length becomes the width.
- If fabric is loosely woven, or if fraying fabric edges is a concern use a product such as June Tailor® Fray Block. Apply to raw edges of fabric and allow to dry. Dries soft and clear.
- When creating multiple matching window treatments for the same room, measure each window. Windows do not always have identical dimensions.

## CHESAPEAKE CORNICE WITH PLEATED WRAP

### SUPPLIES AND TOOLS: Standard 40" Cornice

- June Tailor® Chesapeake Cornice Kit
- 2/3 yd of 54" main fabric
- 1/2 yd of 54" lining fabric
