STORAGE

Keep your collection of sewing tools neatly organized while you work and when you are on the go.

Organize your design space and keep tools within easy reach with the **tool holder**. Place it near your sewing machine, work table or hang it on the wall. The multiple compartments help to organize your scissors, seam ripper, pencils, markers and seam gauge. Three swing-out drawers hold buttons, pins, snaps and smaller items.

The **tool box** includes a removable tray designed to hold your scissors, tape measure, seam ripper, seam gauge, marking pencils, chalk and other tools.

Carry your design and sewing tools in style using the **project bag**. Pockets inside the bag hold long rulers, design tools and pencils, plus there's even a pocket for your cell phone!

The tool box fits into the bottom of the project bag.

Please read and follow all manufacturers' instructions for all tools and materials used. Provide adult supervision if children participate in this project. ©2008 Jo-Ann Stores, Inc. All rights reserved.

DESIGN

DRESSFORM

Turn your fashion design dreams into reality using the four-part adjustable **dressform** with decorative wooden neck finial, sturdy wheeled base and natural knit fabric cover. The dressform helps with draping of fabric, fitting, checking placement and making adjustments to garments. Available in size small.

Please go to the cutting counter to special order this dressform.

MEASURE

The **design ruler** is used for drafting and designing patterns, plus it also helps in the alteration of patterns and garments. It's basically four rulers combined into one – a hip curve, a French curve, a straight ruler and it has slotted cut-outs that help guide your tracing wheel when marking straight lines.

Want to know how to keep your 60" tape measure tangle-free and easy to find?

Wind it up in the **tape measure pod** for simple use and quick storage. The back of the tape measure includes centimeters and inches printed in reverse sequence, so it's always ready to use from either end.

The 7" multi-purpose **seam gauge** with point turner and sliding right-angle marker is a designer's best friend! Use the point turner to gently push out corners on collars, cuffs and waistbands. The sliding marker helps measure and mark hem depths and check seam allowances.

PINS

Keep pins handy when you are cutting, sewing and fitting fabric by wearing a **wrist pin cushion** filled with pins. Add a designer touch to your pin cushion with the decorative extra-long **flat button pins**.

Specialty pins are comprised of glass head, super-fine sharp and ball point pins. These pins are ideal for working with delicate and specialty fashion fabrics such as microfibers and knits. The boxes are reusable and stack easily.

CONSTRUCTION

MARK

Blue, white and yellow **designer's chalk** is suitable for drawing lines and marking alterations on fabrics with a flat, smooth surface. Always choose the chalk color closest to your fabric's color.

PRESS

Press as you sew and always protect your fabrics with a silk organza **press cloth**. This lightweight, sheer cloth can withstand steam and high iron temperatures.
